

STATEMENT BY THE GSLP/LIBERAL OPPOSITION

115a/2010

24 August 2010

The Opposition would like to congratulate all those students who passed their GCSE, AS and A level examinations.

All the indicators are that once again Gibraltar has done extremely well and that our pass rate is better than the United Kingdom average.

This is a credit to the hard work produced by the students themselves, the support of their families and the professionalism and dedication of the teaching staff in all our education system.

Education is an investment in the future and it augurs well for Gibraltar that our younger generations continue to perform so well in their exams. It is important that as another wave of young Gibraltarians is ready to set off for UK universities that we ensure that there is adequate provision and advance planning in place to accommodate those who may want to come back once their studies are complete.
